**DETAILED ACTION**

1. Claims 1-17 are pending.

***Allowable Subject Matter***

2. Claims 1-17 are allowed.
3. The following is examiner's statement of reasons for allowance:

The present claims are allowable over the closest reference: Fuss et al. (U. S. Patent 6,808,858).

Fuss discloses a light-sensitive composition containing: (i) at least one diazonium polycondensation product or at least one system that can be radically polymerized and consists of photoinitiators and unsaturated compounds; (ii) at least one binding agent and optionally one or more exposure indicators, one or more dyes for increasing the image contrast and one or more acids for stabilizing the light-sensitive composition which is characterized in that the binding agent essentially consists of units (A, B, C, D) (abstract).

The component B being present in an amount of from 0.1 to 60 mol %, preferably from 20 to 55 mol %, and corresponding to the formula

This group of monomers is readable in applicant's claims as being monomer a).

The component C being present in an amount of from 10 to 80 mol %, preferably from 25 to 65 mol %, and corresponding to the formula

in which  $R^2$  is a hydrogen atom, an alkyl radical having from 1 to 10 carbon atoms which may be unsubstituted or substituted with at least one carboxyl group, sulfonic acid group, hydroxyl group or at least one halogen atom, preferably a methyl, ethyl or propyl group, or an aryl group which may be unsubstituted or substituted with at least one alkyl group, carboxyl group, sulfonic acid group, hydroxyl group or at least one halogen atom, it being possible for this unit to be present several times with different radicals  $R^2$  independently of one another.

This group of monomers is readable in applicant's claims as being monomer b).

The component D being present in an amount of from 1 to 20 mol %, preferably from 2 to 8 mol %, and corresponding to the formula

in which  $R^3$  is a hydrogen atom or alkyl radical having 1 to 10 carbon atoms, which may be unsubstituted or substituted by a carboxyl group,  $R^3$  preferably being a hydrogen atom, a methyl group or  $-CH_2COOH$  group (col. 3, line 46 through col. 4, line 21).

However, Fuss does not disclose or fairly suggests the reaction of a polyvinylacetal with a polyaldehyde in accordance with applicants' formula (5), nor does it demonstrate crosslinking a polyvinylacetal as per claim 1. Also Fuss does not disclose or fairly suggests at least partially esterifying groups in accordance with applicants' formula (1) and formula (4) of polymer (A1).

4. The following reference is considered pertinent to the Applicant disclosure include U.S. Patent 6,265,509 is shown on the Notice of References Cited Form (PTO-892).

U.S. Patent 6,265,509 discloses a process for the production of moldings, in particular contact lenses, in which a soluble prepolymer comprising units containing a crosslinkable group and at least one unit containing a modifier is crosslinked in solution, and to moldings, in particular contact lenses, obtainable by this process. The prepolymers which can be employed in the process, in particular derivatives of a polyvinyl alcohol having a molecular weight of at least about 2000 which comprises from about 0.5 to about 80%, based on the number of hydroxyl groups in the polyvinyl alcohol, of units of the formulae I and II, II and III or I, II and III, as disclosed in detail in the description (abstract).

5. As of the date of this Notice of Allowability, the Examiner has not located or identified any reference that can be used singularly or in combination with another references including Fuss et al. to render the present invention anticipated or obvious to one of ordinary skill in the art.

Art Unit: 1796

6. In the light of the above discussion, it is evident as to why the present claims are patentable over the prior art.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delay, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reason for Allowance".
